

AMENDMENT TO THE SPECIFICATION

Please amend paragraphs [0023] and [0024] as follows:

[0023] The processes described above can be stored in the memory of a computer system as a set of computer-readable instructions to be executed. In addition, the instructions to perform the processes described above could alternatively be stored on other forms of machine-readable media, including magnetic and optical disks. For example, the processes described could be stored on machine-readable media, such as magnetic disks or optical disks, which are accessible via a hard disk (or computer-readable medium drive). ~~Further, the instructions can be downloaded into a computing device over a data network in a form of compiled and linked version.~~

[0024] Alternatively, the logic to perform the processes as discussed above could be implemented in additional computer and/or machine readable media, such as discrete hardware components as large-scale integrated circuits (LSI's), application-specific integrated circuits (ASIC's), and firmware such as electrically erasable programmable read-only memory (EEPROM's); ~~and electrical, optical, acoustical and other forms of propagated signals (e.g., carrier waves, infrared signals, digital signals, etc.); etc.~~
